User's Manual for GV-Hot Swap DVR System V2

Welcome to the GV-Hot Swap DVR System V2 User's Manual.

The Manual provides an overview of the GV-Hot Swap DVR System V2 and its accessories. It also includes the instructions to guide you through the installation and use of the GV-Hot Swap DVR System V2:

- **Chapter 1, *Introduction***

Identifies the GV-Hot Swap DVR V2's accessories and options.

- **Chapter 2, *Overview***

Identifies the GV-Hot Swap DVR V2's components.

- **Chapter 3, *Getting Started***

Provides step-by-step instructions on setting up the GV-Hot Swap DVR V2.

- **Chapter 4, *DVR Health Analysis***

Introduces how to collect data to obtain the service of DVR health analysis from GeoVision.

- **Chapter 5, *Troubleshooting***

Suggests courses of action if the GV-Hot Swap DVR V2 doesn't seem to be working properly.

Regulatory Notices

FCC Notice

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment.

Class A

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at their own expense.

CE Notice

This is a Class A product. In a domestic environment, this product may cause radio interference in which case the user may be required to take adequate measures.

RoHS RoHS Compliance

The Restriction of Hazardous Substances (RoHS) Directive is to forbid the use of hazardous materials of production. To meet the RoHS Directive requirements, this product is made to be RoHS compliant.

WEEE Compliance

This product is subject to the Waste Electrical and Electronic Equipment (WEEE) Directive and made compliant with the WEEE requirements.

Safety Instructions

Observe these safety instructions to help ensure against injury to yourself and damage to the product.

- **Read** all safety and installation instructions before you operate the product.
- **Do not operate** the product in high humidity areas or expose it to water or moisture.
- **Do not put** the product in an unstable, a slanting or vibrated place.
- **Do not block** any ventilation opening.
- **Do not install** the product near any heat sources such as radiator, heat register or other apparatus that produce heat.
- **Operate** the product using only the type of power source indicated on the marking label.
- **Do not defeat** the safety purpose of the grounding-type plug. A grounding plug has two blades and a third grounding prong. The third prong is provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- **Do not overload** wall outlets or extension cords, as this may cause fire or electric shock.
- **Do not use** the product when abnormality occurs, such as emitting smoke from the product, smelling burning, being damaged by drop, invasion of foreign objects inside the product, etc. Be always sure to remove the AC adaptor at once and contact your dealer.
- **Do not use** accessories or attachments not recommended by the manufacturer, as they may cause hazards and void the warranty.
- **Do not attempt** to service the product yourself, as removing the casing may expose you to dangerous voltage and void the warranty.

Chapter 1 Introduction

1.1 Unpacking

The GV-Hot Swap DVR V2 package includes the following items:

Important: Please keep the original carton and all packing materials for future shipping need.

1. GV-Hot Swap DVR System V2 x 1

2. D-Type Audio Cable x 2
(1 x 1-8 Channels Red Cable, 1 x 9-16 Channels Red Cable)

3. AC Power Cord x 1

4. RJ-11 to DB9 Cable x 1

5. Lock Key x 2

6. GV-Keyboard Package x1

7. IR Remote Control Package x 1

8. Self-Stick Rubber Pad x 4
9. Recovery DVD x 1
10. Nero Express CD x 1
11. Surveillance System Software CD x 1
12. GV-Hot Swap DVR System V2 User's Manual x 1
13. GV-Hot Swap DVR System V2 Quick Start Guide x 1
14. Surveillance System New Feature Guide x 1
15. Surveillance System Installation Guide x 1

If any of the items are missing or damaged, contact your dealer to arrange a replacement.

1.2 Models

The GV-Hot Swap DVR V2 has the following models:

GV-2016H V2	<ul style="list-style-type: none"> - Sixteen-channel digital video recorder - Records up to 480 (NTSC) / 400 (PAL) fps at the D1 resolution - Has the option of 4 / 6 / 8 / 10 hot-swap SATA drive bays
GV-2008H V2	<ul style="list-style-type: none"> - Eight-channel digital video recorder - Records up to 240 (NTSC) / 200 (PAL) fps at the D1 resolution - Has the option of 2 / 4 / 6 / 8 / 10 hot-swap SATA drive bays
GV-1480H V2	<ul style="list-style-type: none"> - Sixteen-channel digital video recorder - Records up to 480 (NTSC) / 400 (PAL) fps at the CIF resolution - Has the option of 2 / 4 / 6 / 8 / 10 hot-swap SATA drive bays
GV-1240H V2	<ul style="list-style-type: none"> - Eight-channel or sixteen-channel digital video recorder - Records up to 240 (NTSC) / 200 (PAL) fps at the CIF resolution - Has the option of 2 / 4 / 6 / 8 / 10 hot-swap SATA drive bays
GV-1120H V2	<ul style="list-style-type: none"> - Sixteen-channel digital video recorder - Records up to 120 (NTSC) / 100 (PAL) fps at the CIF resolution - Has the option of 2 / 4 / 6 / 8 / 10 hot-swap SATA drive bays

* The 2-bay and 10-bay models of GV-Hot Swap DVR V2 series are available upon special request with longer lead time. Please contact your sales representative for further information.

1.3 Options

Optional devices can expand your GV-Hot Swap DVR V2's capabilities and versatility. Contact your dealer for more information.

GV-Video Loop Through Card	This card can take the video signal from the GV-Hot Swap DVR V2 and then split it into 16 signals while maintaining video quality. It can meet the need for multiple spot monitors.
GV-IO 12-In Card	With 12-point digital inputs, this card can expand the GV-Hot Swap DVR V2 up to 16 sensor inputs.
GV-IO 12-Out Card	With 12-point relay outputs, this card can expand the GV-Hot Swap DVR V2 up to 16 alarm outputs.
GV-Multi Quad Card	With this card, the GV-Hot Swap DVR V2 can connect up to 5 TV screens. The screen divisions on the TV screens are definable.
GV-I/O USB Box	GV-I/O USB Box provides 16 inputs and 16 relay outputs, and up to 9 GV-I/O USB Boxes can chain together to expand the use. However, 16 inputs are only supported when it is used with GV-System of version 8.2 or later.
GV-Data Capture V3 Series	GV-Data Capture V3 can integrate the GV-Hot Swap DVR V2 to an electronic POS system, while GV-Data Capture V3E can establish such integration through LAN or Internet.
GV-Hub Box	An easy way for serial port extension. This hub can add 4 RS-232/RS-485 serial ports through the GV-Hot Swap DVR V2's USB port.
GV-COM Box	This unit can add 1 RS-232/RS-485 serial port through the GV-Hot Swap DVR V2's USB port.
GV-Joystick	GV-Joystick facilitates the PTZ camera control. It can be either plugged into the GV-Hot Swap DVR V2 for independent use or connected to GV-KeyBoard to empower the operation. However, this device can only work on GV-System version 8.2 or later.
RAID Controller (0 / 1 / 5 / 6)	The RAID Controller supports a maximum of 10 SATA hard drives and enhances data protection. The supported RAID types include RAID 0, RAID 1, RAID 5 and RAID 6. This card is only available in the 8-bay and 10-bay GV-Hot Swap DVR V2.
VGA Card	With the VGA card, the dual display for monitoring and playback is made possible.
RAM	Multiple options for the amount of RAM are available to meet different needs.
Hard Drive	Multiple options for the HDD capacity are available to meet different needs.
GV-DOM (Disk on Module)	GV-DOM, a solid-state hard drive, is used for operating system and system software to get higher performance under harsh conditions.

Note:

1. GV-Video Loop Through Card, GV-IO 12-In Card, GV-IO 12-Out Card and GV-Multi Quad Card are not available to all 2-bay models of GV-Hot Swap DVR V2.
2. The purchased GV-series cards will be added on the GV-Hot Swap DVR V2 before shipment.

Chapter 2 Overview

2.1 Front View

Figure 1

1	SATA Backplane Reset Switch	10	Hard Drive Activity LED
2	HDD 1 (Power Switch)	11	DVD (±) RW Drive
3	HDD 2 (Power Switch)	12	HDD 7 (Power Switch)
4	HDD 3 (Power Switch)	13	HDD 8 (Power Switch)
5	HDD 4 (Power Switch)	14	Power Switch
6	HDD 5 (Power Switch)	15	Rest Button
7	HDD 6 (Power Switch)	16	USB Port x 2
8	Fan Sensor LED	17	Safety Lock
9	Power LED		

All 2-bay models and 10-bay models of GV-Hot Swap DVR V2 are equipped with slim DVD±RW drives, while the sizes of DVD±RW drives on the 4-bay, 6-bay and 8-bay models are 5.25 inch. The locations of the DVD±RW drives on the front panel of 2-bay and 10-bay models are different from those on the other models.

The front panels presented below are of the 2-bay and 10-bay models, and they indicate the locations of the slim DVD±RW drives. For the names of other inputs and ports on the front panel, please refer to Figure 1.

2-Bay Models

Figure 2

10-Bay Models

7	Audio Line In Port	16	AC Power Switch
8	Audio Line Out Port	17	AC Power Input (Full Range)
9	Ethernet Port x 2		

Owing to the model design, the rear panels of all 2-bay models are different from those of the other models.

In Figure 4 the rear panel presented is of all 4-bay, 6-bay, 8-bay and 10-bay models. The figure below displays the rear panel of all 2-bay models.

2-Bay Models

Figure 5

Chapter 3 Getting Started

3.1 Basic Installation

Basic installation describes all the equipments required to program and operate the GV-Hot Swap DVR V2.

Figure 6

1. Using the supplied power cord, connect one end to the AC input and the other end to the power outlet.
2. Connect the keyboard to the PS/2 input.
3. Connect the mouse to the PS/2 input.
4. Using the VGA cable supplied by the monitor manufacturer, connect the VGA monitor.
5. For video lost beep, connect Speakers to the Audio Line Out port.
6. Using the RJ-45 cable, connect one end to the Ethernet port and the other end to Network.
7. Using the BNC video cables, connect one end to the BNC connectors and the other end to video sources.
8. Using the supplied D-type audio cables, connect one end to the audio ports and the other end to audio sources.

Note: The monitor you use must be capable of having a screen resolution of 1280 x 1024 and display color of 32 bits.

3.2 Turning on the Power

Once the above hardware is properly connected, it is the time to turn on the GV-Hot Swap DVR V2. To turn on the power, follow these steps:

1. Turn on the monitor.

Figure 7

2. Turn on the AC power switch on the rear panel.

Figure 8

3. Turn on the main power switch on the front panel.

Figure 9

The GV-Hot Swap DVR V2 will run a series of self-tests. After two or three minutes, a series of messages may be displayed as the various hardware and software subsystems are activated. After this is finished, the GV-System Software (Multicam Surveillance System) should load automatically and bring you to the main screen with 8 or 16 cameras display.

3.3 Installing the Hard Drive

The GV-Hot Swap DVR V2 uses SATA hard drives for video and audio data storage. Before recording, ensure to install your hard drives.

1. Turn off the power of the drive bay. Make sure the Power LED is off.
2. Turn the safety lock to the OPEN position.
3. Push the safety lock. The drawer handle pops up.
4. Pull out the drive drawer.

Figure 10

5. Remove the lid of the drawer.

Figure 11

6. Insert the hard drive in the drawer, and slide the lid back on.

Figure 12

7. Turn over the drawer, and secure the hard drive with the 4 screws (included in the drawer).

Figure 13

8. Put the drawer back in the drive bay of the GV-Hot Swap DVR V2.
9. Push the drawer handle back, and turn the safety lock to the LOCK position.
10. Press the Power button. When the Power LED indicates green, the hard drive is ready to use.

3.4 Formatting the Hard Drive

After installing hard drives to your GV-Hot Swap DVR V2, you may need to format them before use.

1. Go to the GV-Desktop, click the **Programs** button, and select **Disk Management**.

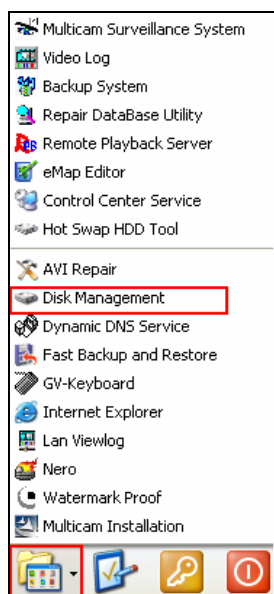

Figure 14

2. The Initialize and Convert Disk Wizard appears. Click **Next** to continue.

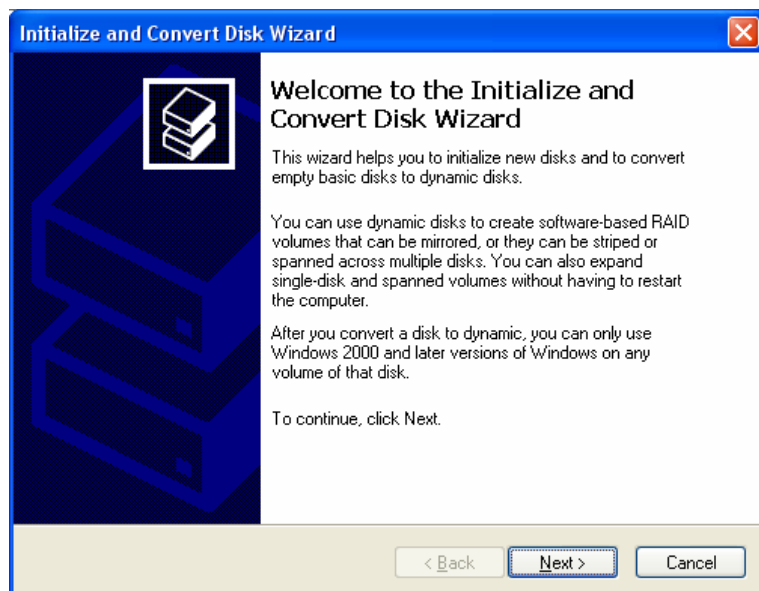

Figure 15

Note: If the Wizard does not appear, you need to initialize the drives one by one. To manually initialize a drive, right-click on the name of the drive and select **Initialize Disk**.

3. The screen shows the drives you selected to initialize. Make sure all drives are checked, and click **Next** to continue.

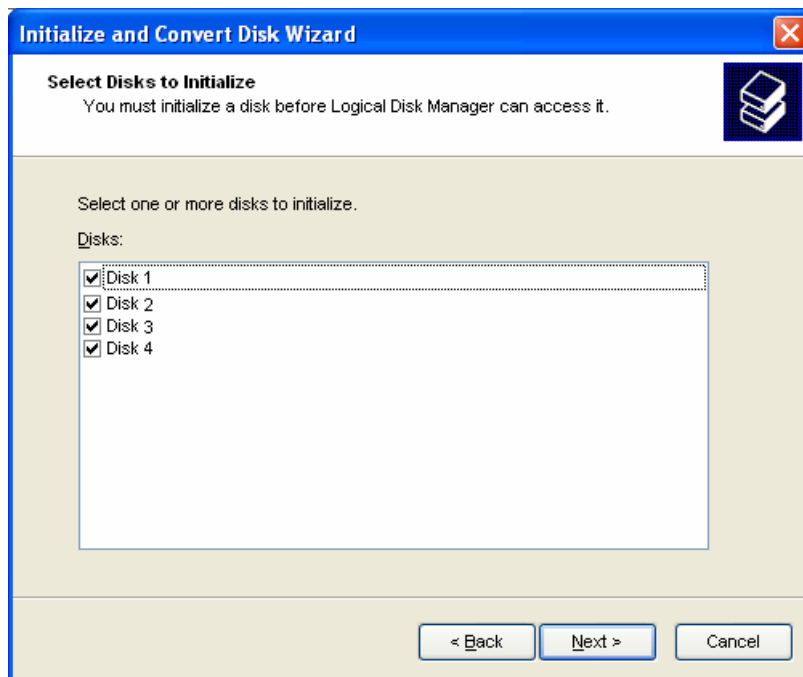

Figure 16

4. The screen gives you the option to convert the drives from basic to dynamic storage. Leave all drives unchecked, and click **Next** to continue.

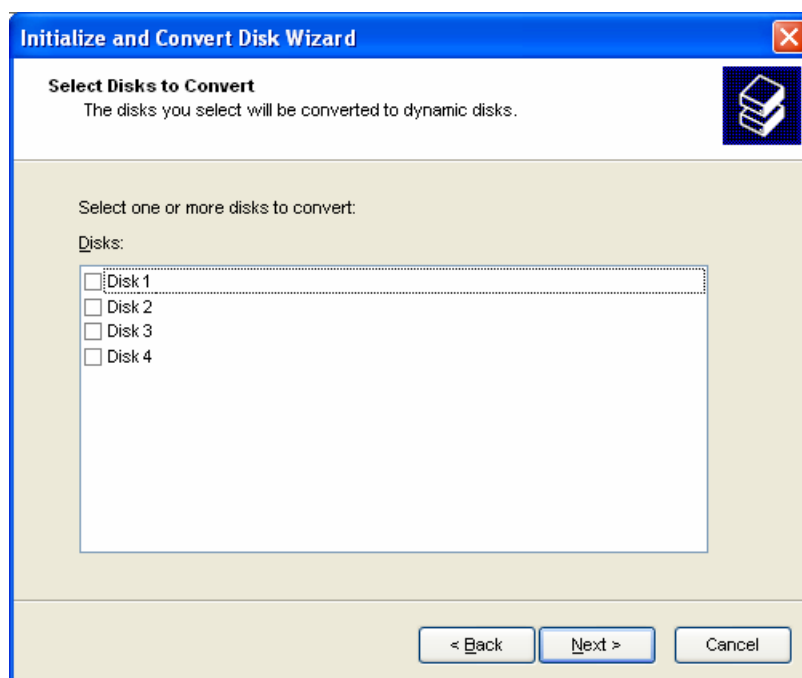

Figure 17

5. When the initialization is complete, click **Finish** to close the wizard.

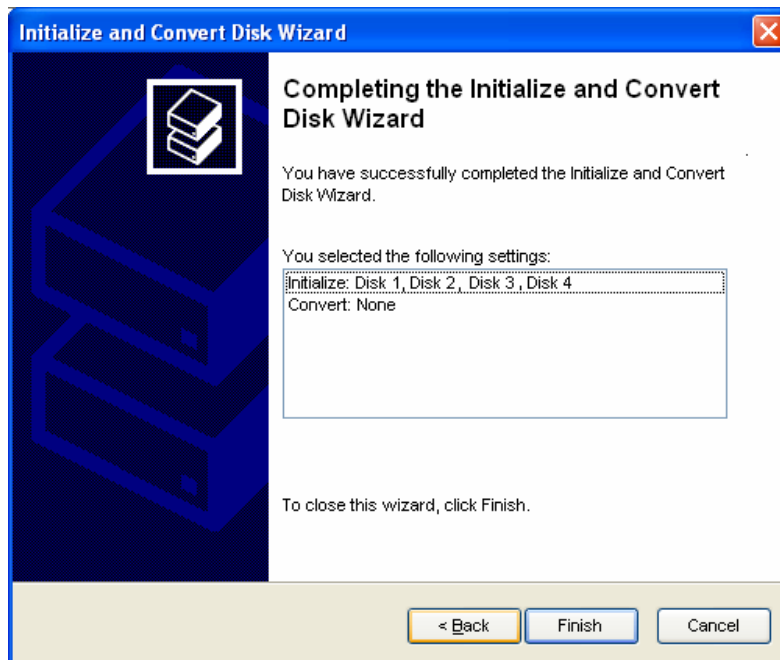

Figure 18

6. Right-click in the unallocated space of a new drive, and select **New Partition...**

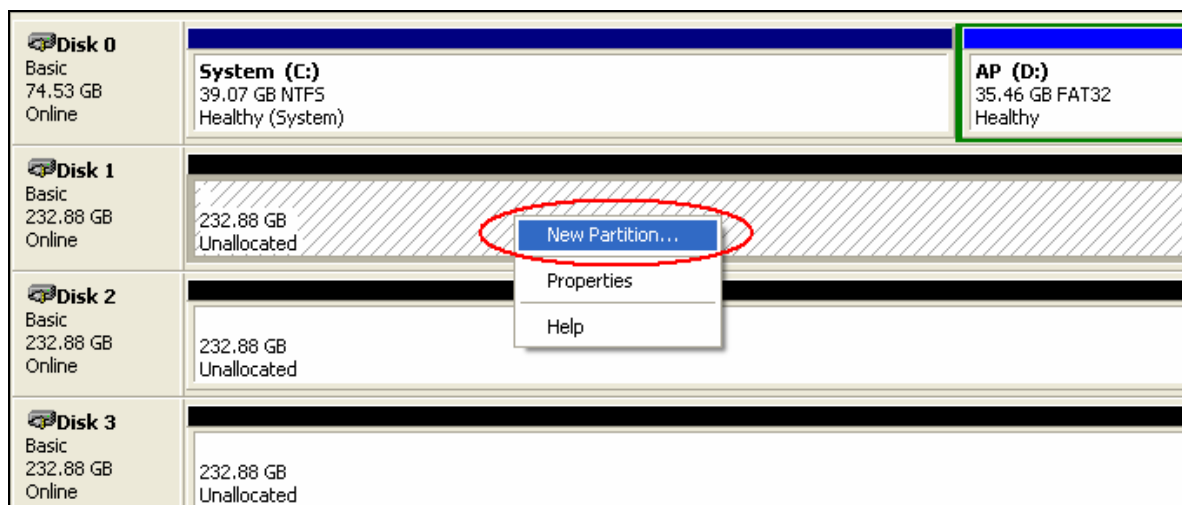

Figure 19

7. The New Partition Wizard appears. Click **Next** to continue.

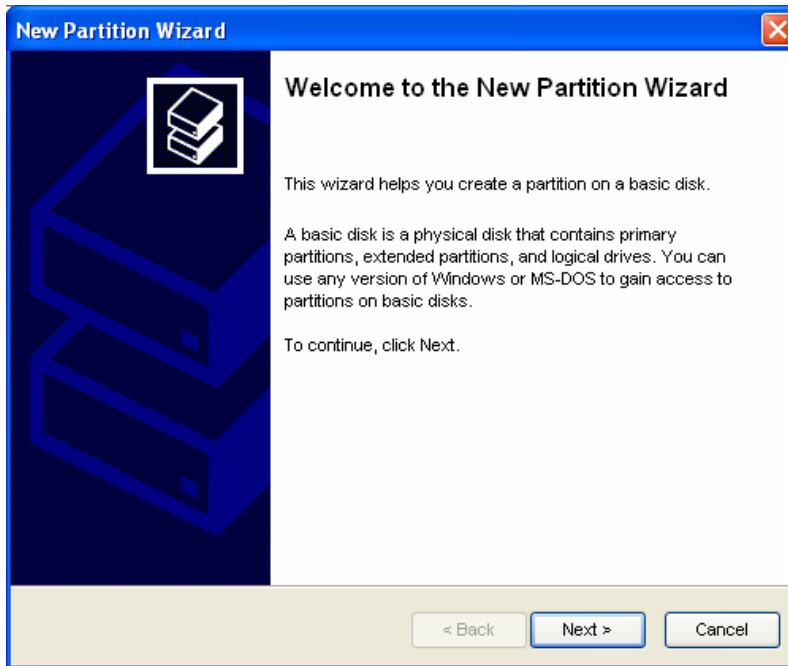

Figure 20

8. Select **Primary partition**, and click **Next** to continue.

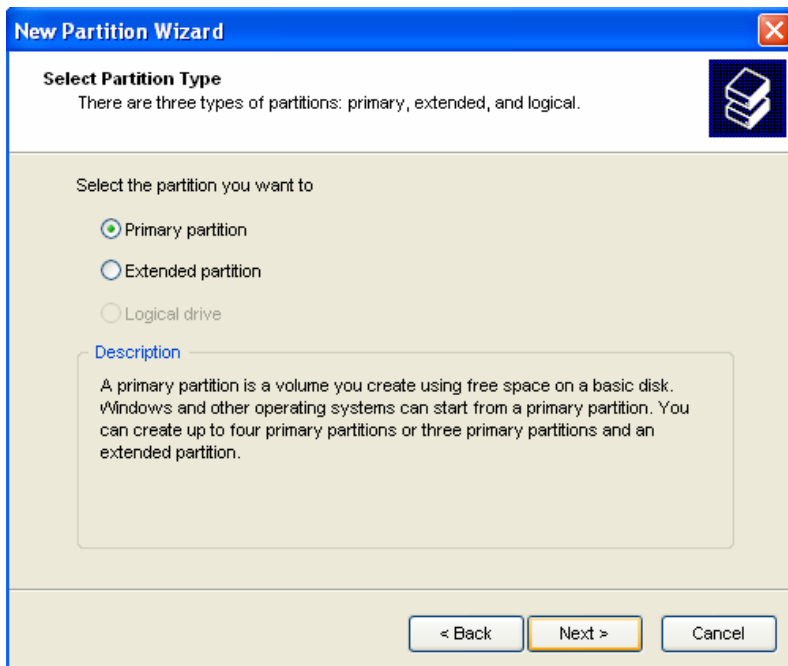

Figure 21

9. The default partition size is the same as the maximum disk space. Make changes if necessary. Click **Next** to continue.

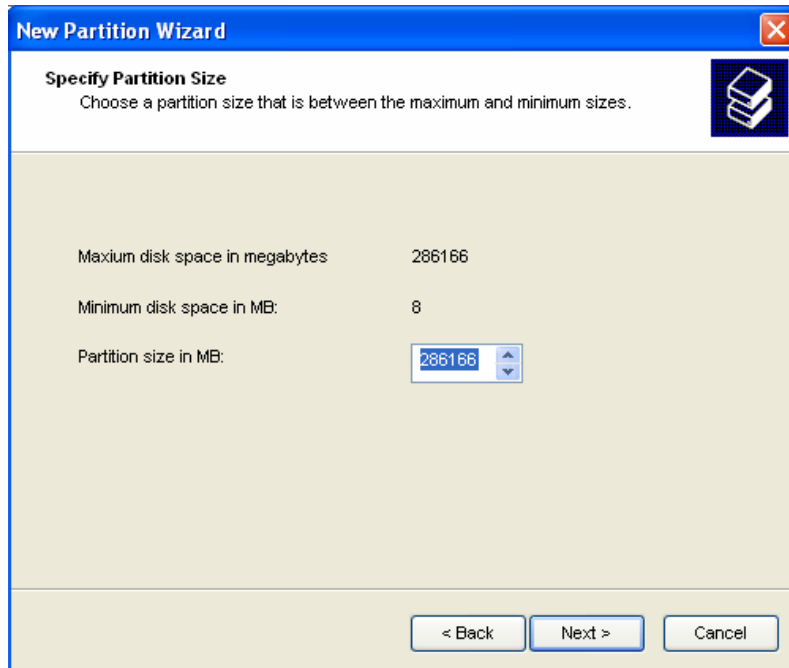

Figure 22

10. Assign a drive path that is not in use by other devices, and click **Next** to continue.

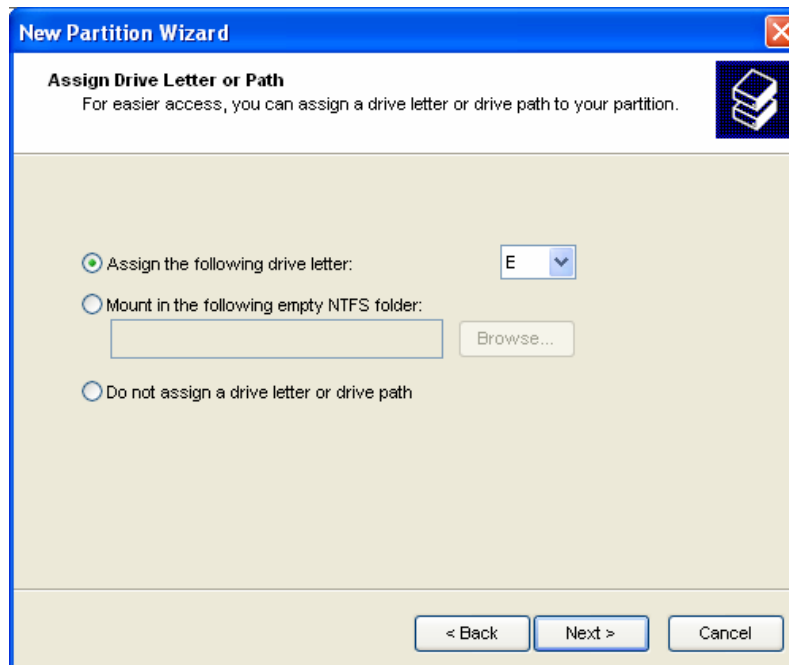

Figure 23

Note: The default drive paths start from **E**.

11. Type a name in the **Volume label** box, ex. HDD1, and click **Next** to continue.

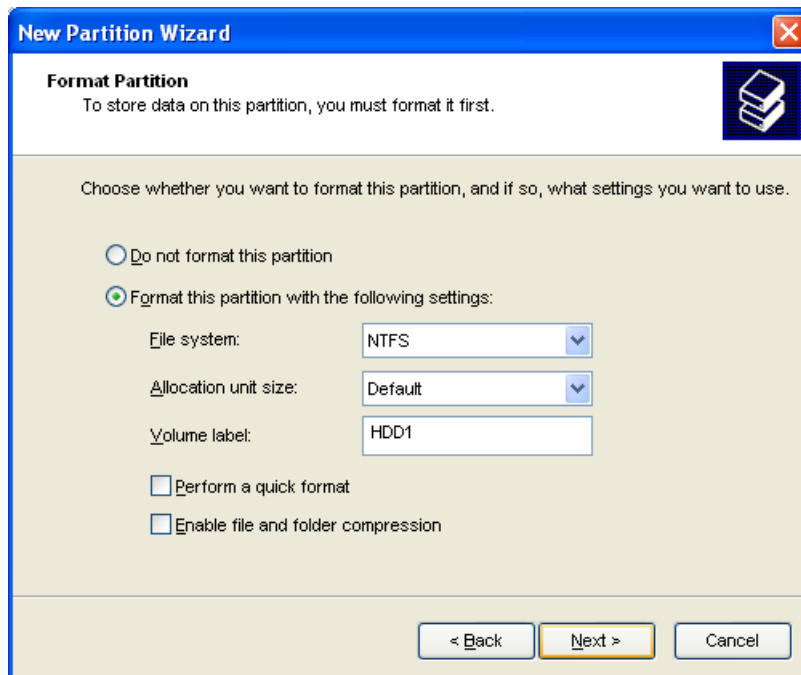

Figure 24

12. When the formatting is complete, click **Finish** to close the wizard.

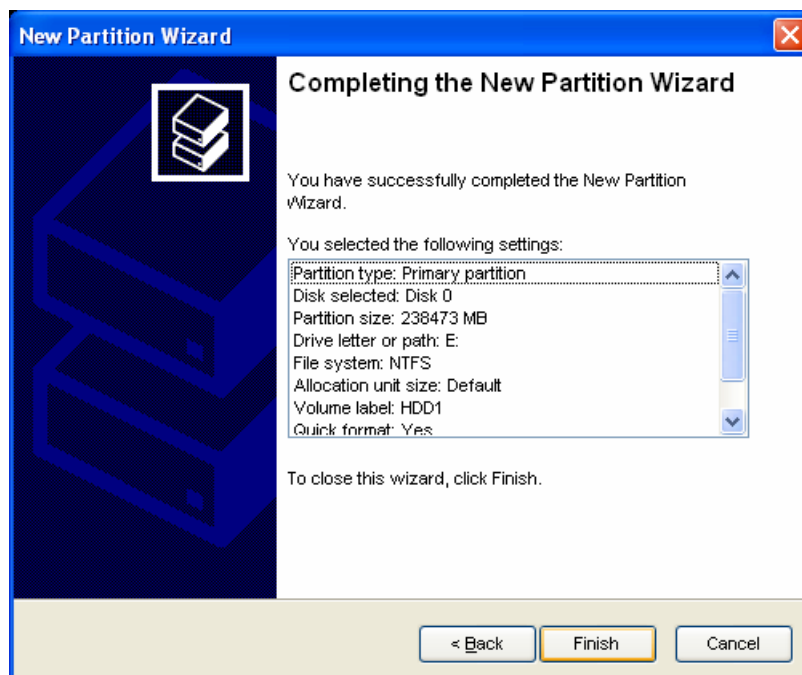

Figure 25

13. When the drive is successfully initialized, partitioned, and formatted, its status description should display “Healthy.”

 Disk 0 Basic 74.53 GB Online	System (C:) 39.07 GB NTFS Healthy (System)
 Disk 1 Basic 232.88 GB Online	HDD1 (E:) 232.88 GB NTFS Healthy
 Disk 2 Basic 232.88 GB Online	HDD2 (F:) 232.88 GB NTFS Healthy
 Disk 3 Basic 232.88 GB Online	HDD3 (G:) 232.88 GB NTFS Healthy
 Disk 4 Basic 232.88 GB Online	HDD4 (H:) 232.88 GB NTFS Healthy

Figure 26

3.5 Adding the Hard Drive to Recording Path

Before recording, you need to add the formatted hard drives to the recording path.

1. On the GV-Desktop, click the **Programs** button, and select **Hot Swap HDD Tool**.

Figure 27

2. Insert a hot-swap hard drive or plug a portable hard drive to the GV-Hot Swap DVR V2. This dialog box appears.

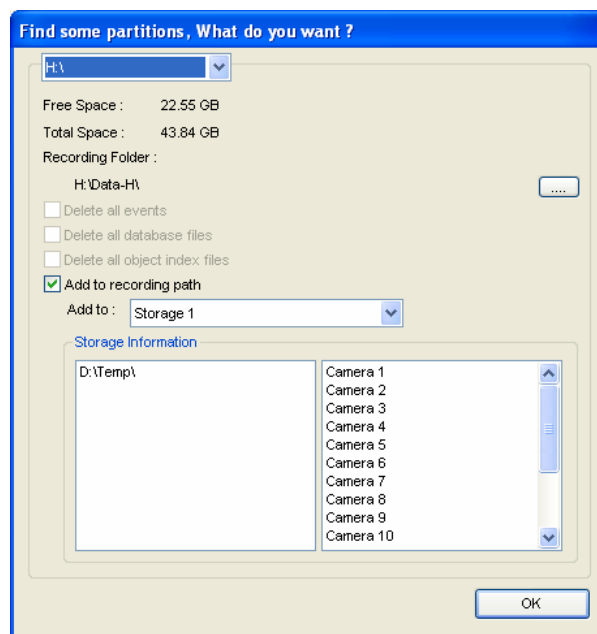

Figure 28

3. Select **Add to recording path**, and select the storage group from the drop-down list.
4. Click **OK** to automatically configure the hard drive to the recording path.

Note: Storage 1 is the default storage group.

5. In the MedianMan Tools window, if the hard drive is successfully added to store data, its Status field should display “Standby”.

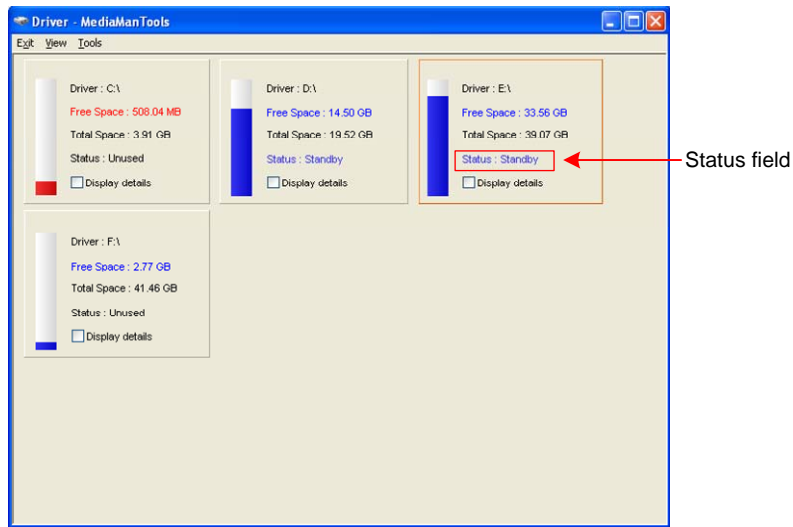

Figure 29

6. To add another formatted hard drive for storage, repeat the above steps.

For the details on using Hot Swap HDD Tool, see *Hot-Swap Recording*, Chapter 10, *User's Manual* on the *Surveillance System Software CD*.

3.6 Replacing the Hard Drive

You can replace the hard drive in the Hot Swap Drive Bay without shutting down the GV-Hot Swap DVR V2.

1. Do not press the Power button to turn off the power.
2. Turn the safety lock to the OPEN position (see Figure 10).
3. Push the safety lock. The drawer handle pops up.
4. Lift the handle, slightly pull out the drawer and wait until the hard drive spins down.
5. Pull out the drawer completely, remove the hard drive, and then mount a new one.
6. Put the drawer back in the drive bay.
7. Push the drawer handle back, and turn the safety lock to the LOCK position.

3.7 Configuring an IP Address

The purpose of configuring an IP address is to support the remote monitoring, control and configuration of the GV-Hot Swap DVR V2 over a network connection.

The GV-Hot Swap DVR V2 is enabled for DHCP network. An IP address will be automatically allocated when the GV-Hot Swap DVR V2 is powered up. Despite the DHCP setting, it is recommended that a static IP address be configured on the unit.

The GV-Hot Swap DVR V2 uses Windows operation system to configure an IP address. For this, you must exit to Windows.

Note: Exiting to the Windows operation system is a protected feature. The default ID and Password is "0000".

Exit to Windows

1. Exit the main screen to display the GV-Desktop screen.

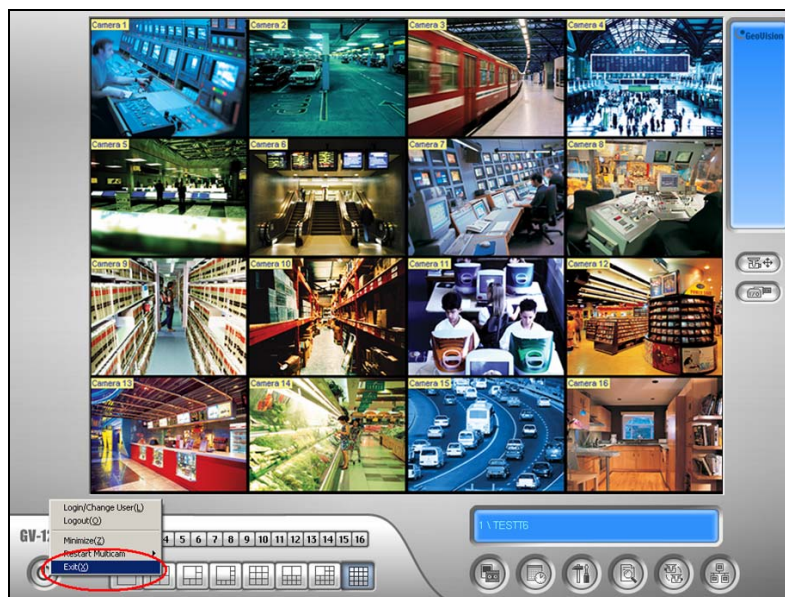

Figure 30 Exit the main screen

2. Click the **Settings** button, and enter the valid ID and Password to display the Settings dialog box.
3. Under Desktop Type, select **Windows** from the drop-down list, and click **OK**.
4. Click the **Log Off** button, and enter the valid ID and Password to display the Windows desktop.

5. Configure a static IP address on the Windows XP platform. Check your network administrator if you have questions about the configuration.

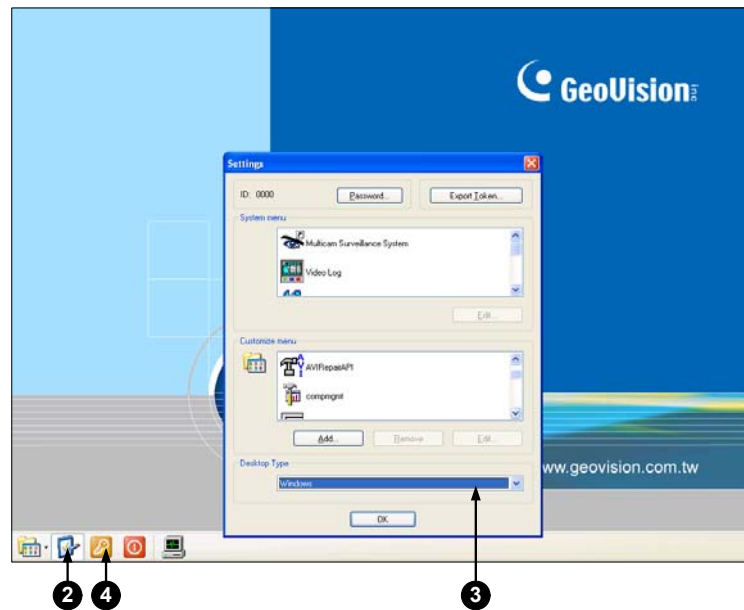

Figure 31 The GV-Desktop

Back to GV-Desktop

Click the Windows **Start** button, point to **Programs**, click **GVCombo**, and click **Key Lock Utility**.

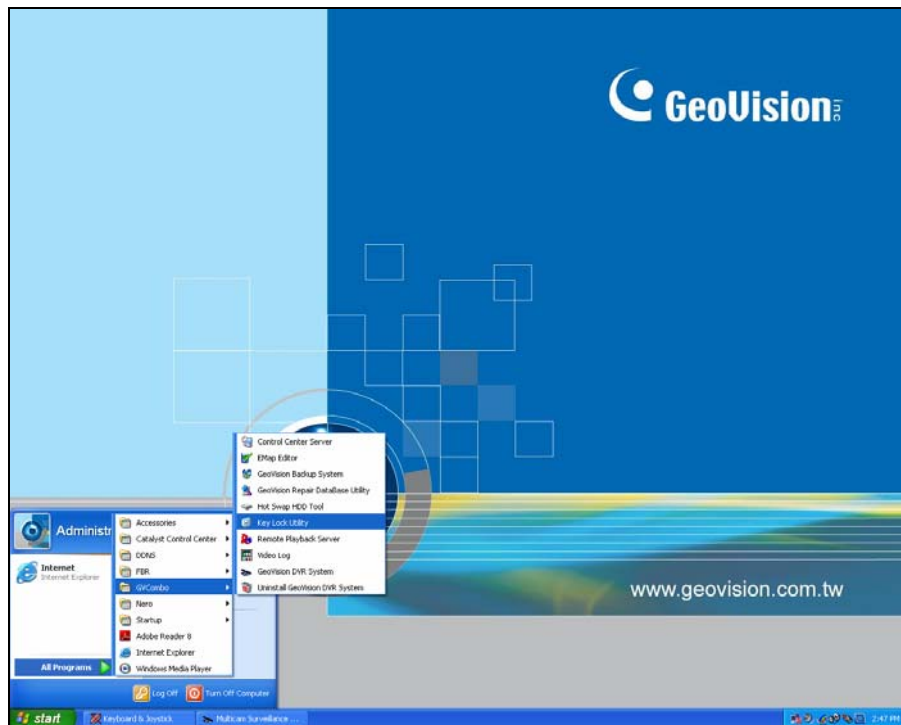

Figure 32 Windows XP desktop

3.8 Extended Installation

Beyond basic installation, the GV-Hot Swap DVR V2 package provides the following accessories to make your unit even more powerful and convenient:

- GV-Keyboard
- IR-Remote Control
- RJ-11 to DB9 Cable for PTZ control

GV-Keyboard

The GV-Keyboard is designed to operate the GV-Hot Swap DVR V2 exclusively. Using the USB cable supplied with the GV-Keyboard, plug one end into the GV-Keyboard and the other end into the assigned USB port (**COM3**) on the front of the GV-Hot Swap DVR V2; you can operate the Keyboard immediately without installing any drivers.

For details on the GV-Keyboard, find the *Installation Manual* included in its own package.

Figure 33

It is also possible to plug the Keyboard into other USB ports of the GV-Hot Swap DVR V2. For this, you must modify the default COM port on the Multicam Controller pop-up once the Keyboard is connected. See Figure 34-1.

To modify the default COM port:

1. Click  to stop the Keyboard service first.
2. In the Port field, modify the port number from the drop-down list. For the port allocation, refer to Figure 34-2.
3. Click  to start the service.

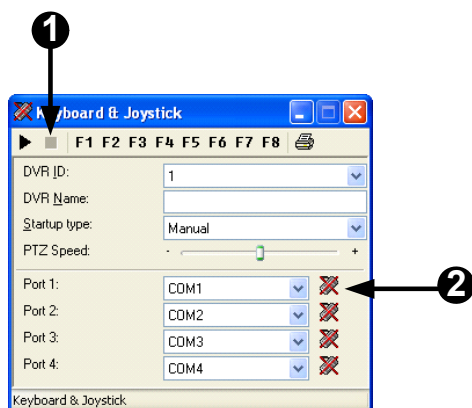

Figure 34-1

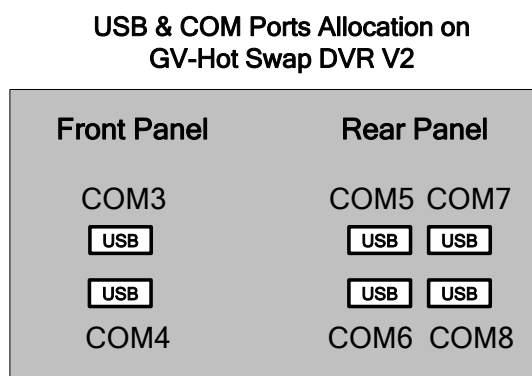

Figure 34-2

IR Remote Control

The IR Remote Control is another plug-and-play device. Simply plug the Receiver into any USB ports of the GV-Hot Swap DVR V2.

For details on the IR Remote Control, find the *User's Manual* included in its own package.

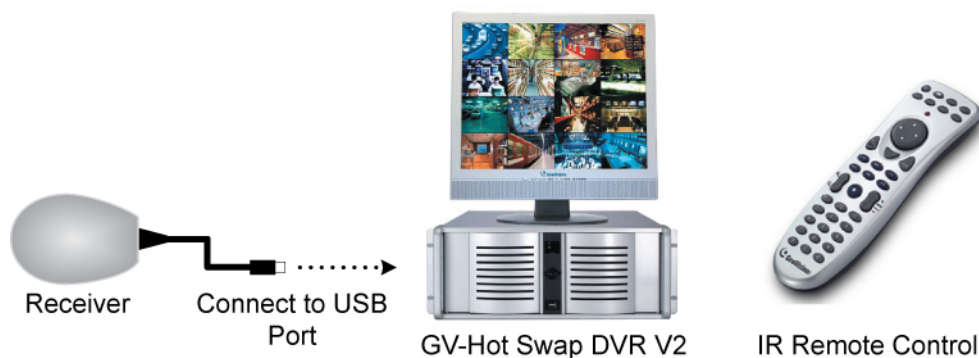

Figure 35

I/O Devices

The GV-Hot Swap DVR V2, with built-in GV-NET/IO Card, provides 4 alarm outputs and 4 sensor inputs.

Figure 36

PTZ Domes

When connecting PTZ domes, you need to plug the supplied RJ-11 to DB9 cable into the DB9 port of the GV-Hot Swap DVR V2.

Figure 37

3.9 Recovery DVD

If preinstalled files are damaged, use the supplied Recovery DVD to restore them. To restore the operation system and all preinstalled software, follow these steps:

Note: After recovery, you need to re-install all settings and passwords. But the recovery will not delete your recording files saved in the GV-Hot Swap DVR V2 since it only reformats the partition C and all of your files are still stored at other partitions.

1. Insert the Recovery DVD, and restart the GV-Hot Swap DVR V2.
2. The message “Are you sure want to recover C partition?” appears. Click **Yes**.

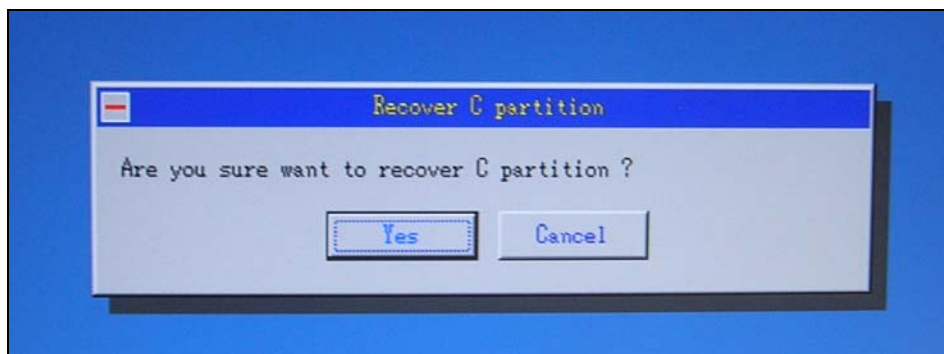

Figure 38

3. When the recovery is complete, the message “Operation completed. Please take out disks from DVD-ROM” appears. Click **Yes**, and remove the DVD.

Figure 39

Configuring the GV-Hot Swap DVR V2 for PAL after Recovery

The default video standard of the Recovery DVD is set to NTSC. If the video standard in your country is PAL, remember to configure the GV-Hot Swap DVR V2 for PAL after using the Recovery DVD.

1. Click the **Configure** button, point to **A/V Setting**, and then select **Video Source**.

Figure 40

2. In the Video Standard field, select **PAL** from the drop-down list, and click **OK**.

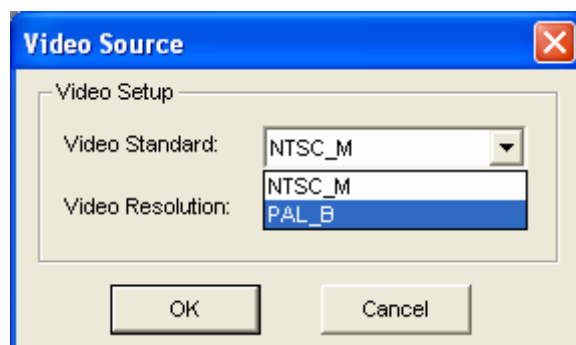

Figure 41

3.10 Updating GV-Hot Swap DVR System V2

GeoVision will periodically release the updated Recovery DVD including the latest GV-System Software (Multicam Surveillance System) and Windows updates. If you like to update your GV-Hot Swap DVR System V2, contact your dealer to get one.

Before contacting your dealer, you may check software update news at our website:

<http://www.geovision.com.tw>

Chapter 4 DVR Health Analysis

GeoVision offers health analysis to GV-Hot Swap DVR V2. The service is intended to give diagnosis for early and immediate detection of problems.

It is recommended to have the health analysis during the first week after you install the GV-Hot Swap DVR V2, and then have the checkup every three months. It will take 5 working days for response.

Please prepare the following data for analysis, and send to dvrssystem@geovision.com.tw

- **System Settings**
- **System Log**
- **Information of your computer system (Processor; Drives; Voltage, Temperature and Fans)**

4.1 System Settings

Please back up your system configurations using the **Fast Backup and Restore** application.

1. Run **Fast Backup & Restore Main System** from the Start menu.

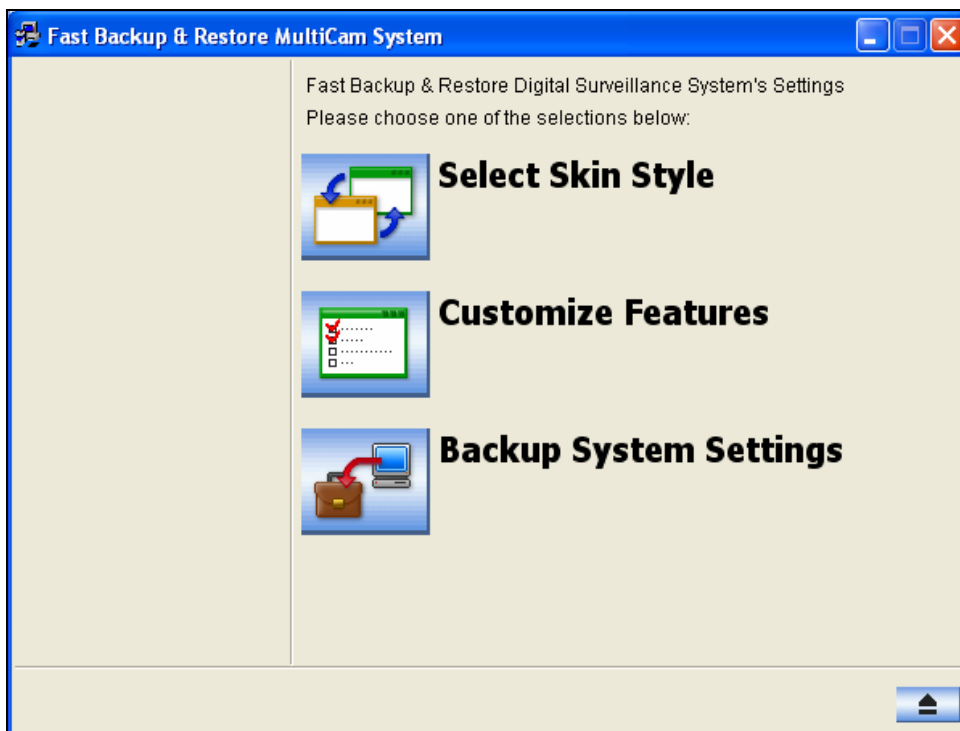

Figure 42

2. Select **Backup System Settings**. This dialog box appears.

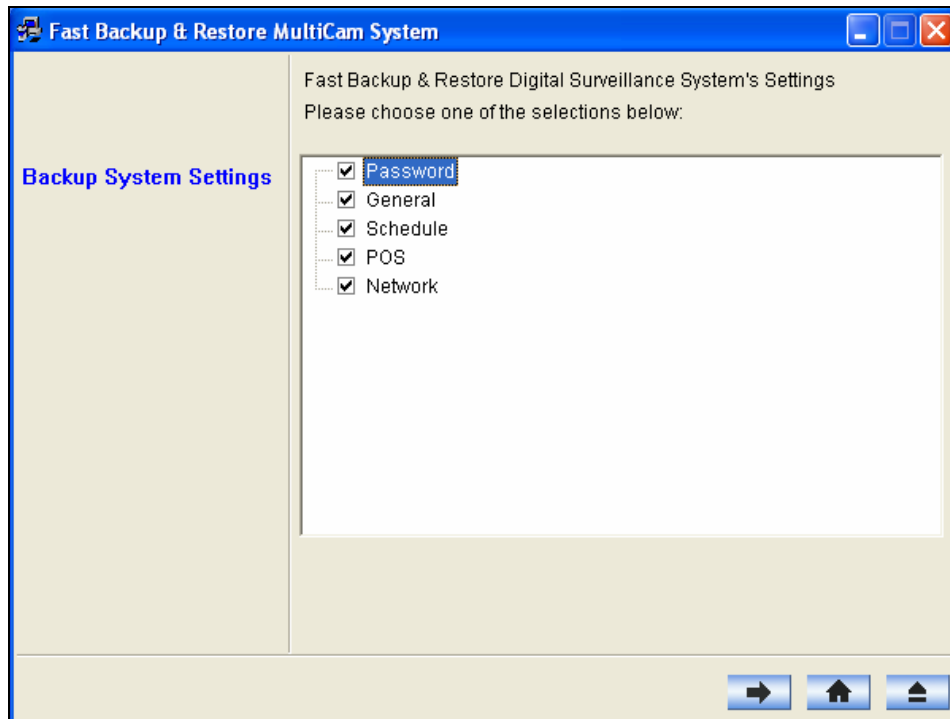

Figure 43

3. Press the **Next Step** button  to back up all your system settings. The Save As dialog box appears.
4. Select the destination drive to store the backup file. When the backup is complete, this message will appear: *Successfully Backup MultiCam System Settings*.

4.2 System Log

Please provide the **sys*.mdb** files of system log. The files by default are saved at **D:\Log\database**. If you have modified the default location, you can check the path by the following steps:

1. Click the **Configure** button on the main system, point to **General Setting**, and then select **System Log Setting**. This dialog box appears.

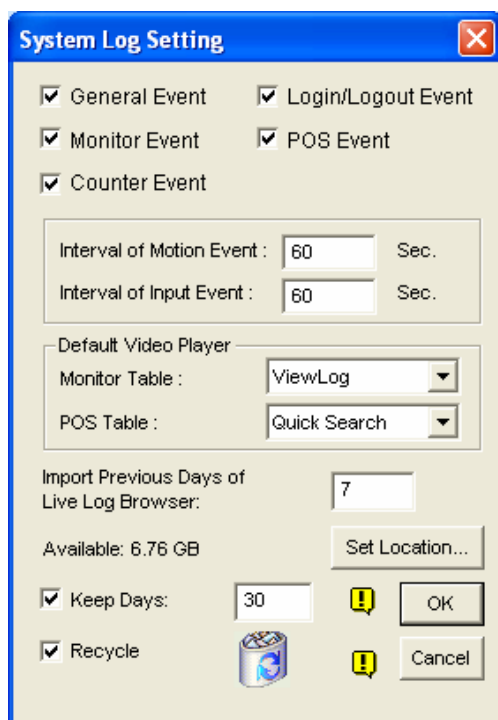

Figure 44

2. Click **Set Location**. You should see the location of your system log.

Figure 45

4.3 Information of Your Computer System

To get the information of your computer system, please follow the steps below to install the free software PC WIZARD. By using the software, the computer information can be easily collected and saved for analysis:

- **Processor:** includes Type, Frequency, Data Cache L1, Trace Cache L1, Cache L2, Voltage, Processor Temperature, FPU Coprocessor.
- **Drives:** includes Number of Hard Disk, Number of Drive, Total Size and Free Space of Drive.
- **Voltage, Temperature and Fans:** includes Monitoring Chip, Voltage CPU, Chassis Fan, Processor Temperature, Mainboard Temperature, Hard Disk Temperature.

1. Download and install **PC WIZARD** from <http://www.cpuid.com/pcwizard.php>.
2. After installation, run the program.
3. Right-click the **Processor** icon  and click **Save as**.

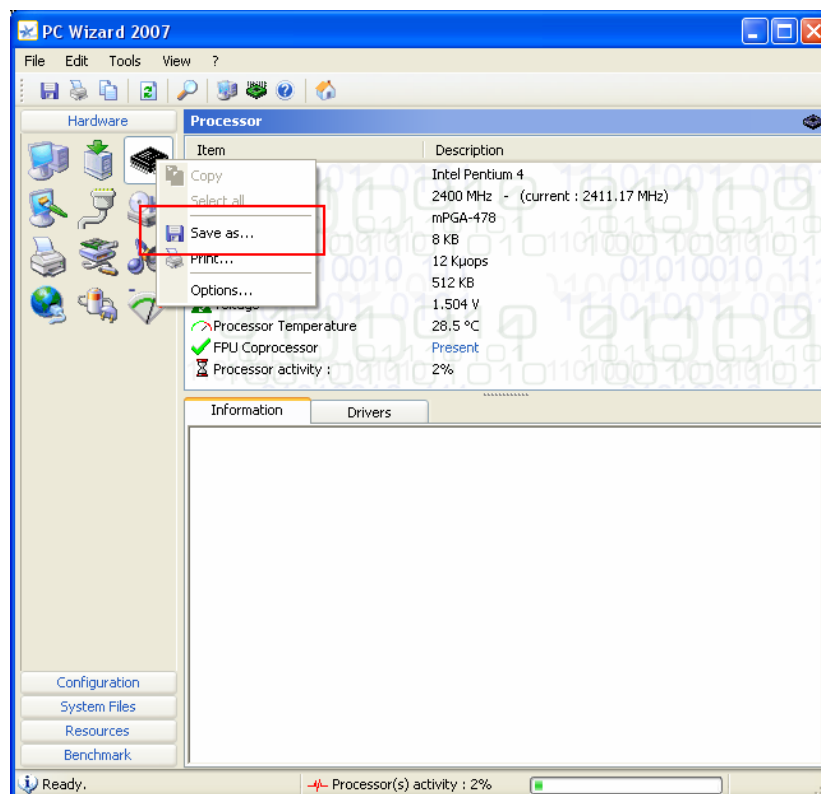

Figure 46

4. In the Save As dialog box, select **Format HTML** and click **OK**.

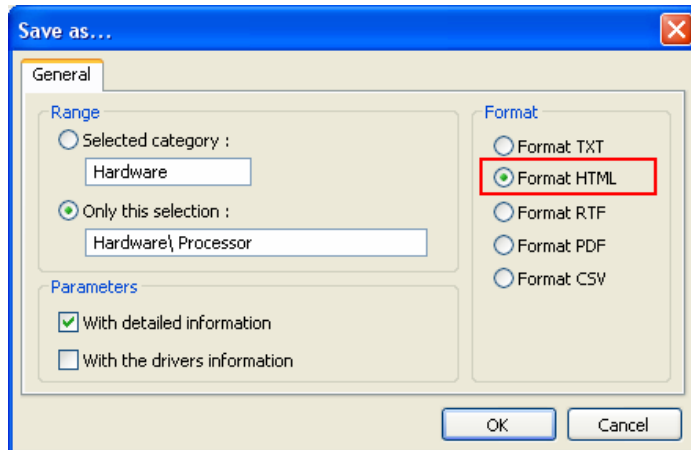

Figure 47

5. Select the Save location, type the file name, and then click **Save** to save the Processor information as HTML file.
6. Repeat Steps 3-5 to save the **Drives** information  as HTML file.
7. To save the **Voltage, Temperature and Fans** information , please follow these steps:
- Click the **Voltage, Temperature and Fans** icon. The related data is displayed at the right window.
 - Click the first item **Monitoring Chip**.
 - Click **Edit** on the menu bar and click **Select All** to highlight all the contents.
 - Click **Edit** on the menu bar and select **Copy**.
 - Open a Notepad. Paste and save the information to TXT file.

4.4 Health Analysis Form

Please send the related data for analysis along with this Health Analysis Form to dvrssystem@geovision.com.tw.

Health Analysis of GV-Hot Swap DVR V2	
Contact Person:	Title:
Company Name:	
Telephone: (O)	(H)

4.5 Check List

Read this check list before submitting the health analysis request:

- System Settings- **EXE file**
- System Log- **sys*.mdb**
- Computer System- Processor information of **HTML file**
- Computer System- Drives information of **HTML file**
- Computer System- Voltage, Temperature and Fans information of **TXT file**
- Health Analysis Form

Chapter 5 Troubleshooting

GV-Hot Swap DVR System V2 is designed for durability. However, should problems occur, following the procedures here can help determine the cause.

A portable 2.5" HDD connected to the GV-Hot Swap DVR V2 front panel cannot be detected.

When the portable 2.5" HDD connected to a GV-Hot Swap DVR V2 cannot be detected, try this step:

Use a dual head USB cable and insert both heads to the USB ports on the GV-Hot Swap DVR V2 front panel as illustrated below.

Figure 48

The Main System cannot be minimized, and the GV-Desktop toolbar fails to appear.

When the GV-Hot Swap DVR V2 is set up in a LAN where its router or server cannot assign the IP addresses through DHCP, the Main System may not be minimized, and the GV-Desktop toolbar may fail to appear. Try these steps:

1. Manually assign the fixed IP address to the GV-Hot Swap DVR V2.
 - A. Unplug the Ethernet cable, and restart the GV-Hot Swap DVR V2.
 - B. Go to the GV-Desktop, click the **Programs** button, and then select **Disk Management**.

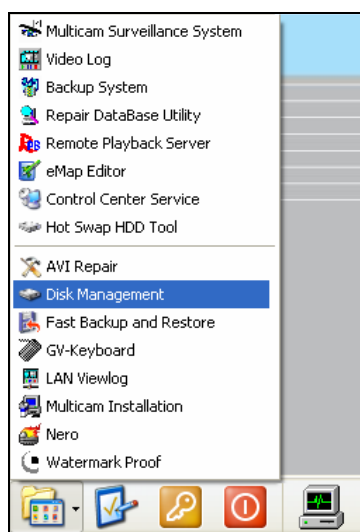

Figure 49

- C. Right-click **System (C:)**, and select **Explore**.

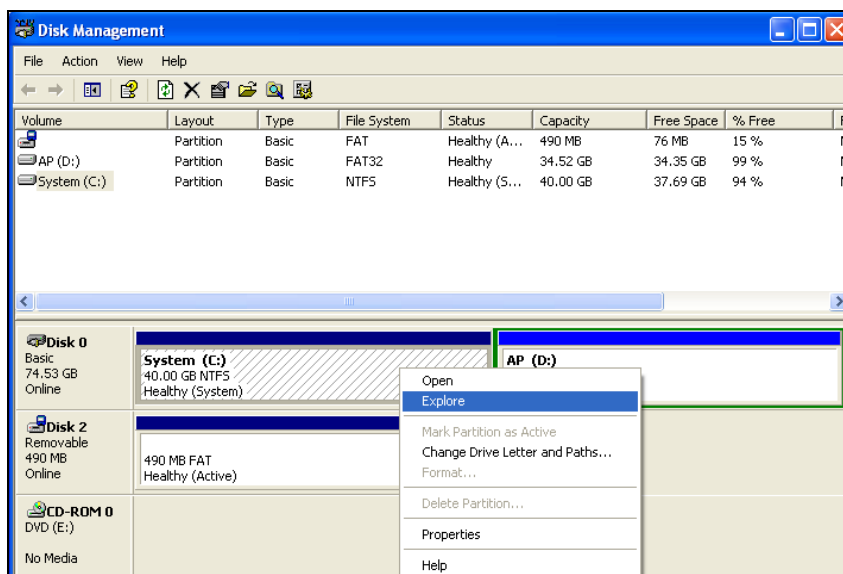

Figure 50

- D. Select **Network Connections**, right-click **Local Area Connection**, and then select **Properties**.

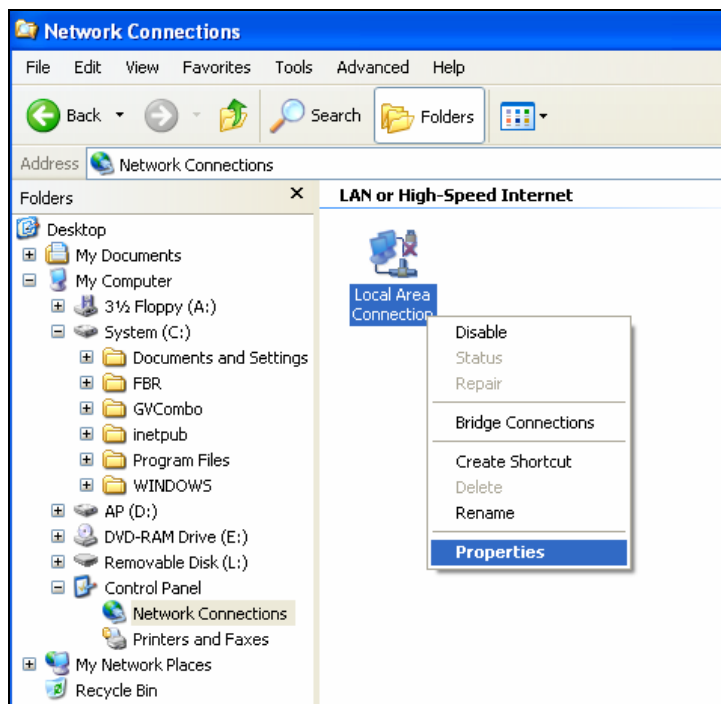

Figure 51

- E. In the Local Area Connection Properties dialog box, select **Internet Protocol (TCP/IP)** and then click **Properties**.

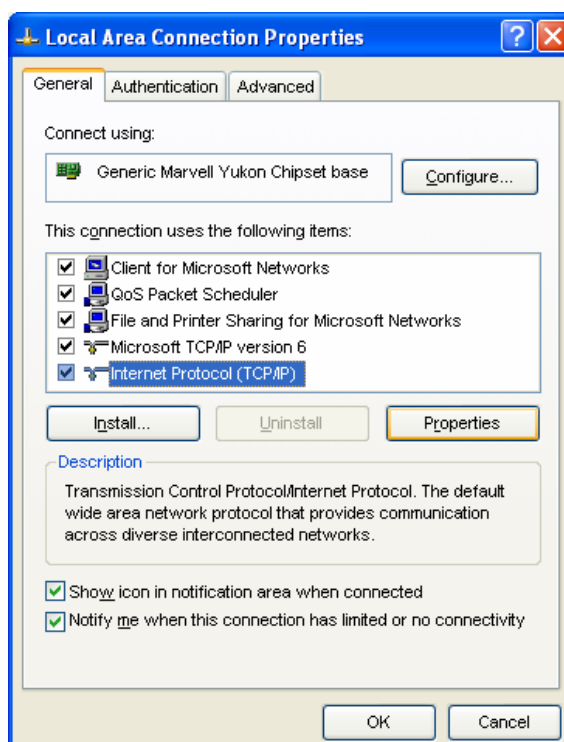

Figure 52

- F. Select **Use the following IP address**, and type the IP info in the fields.

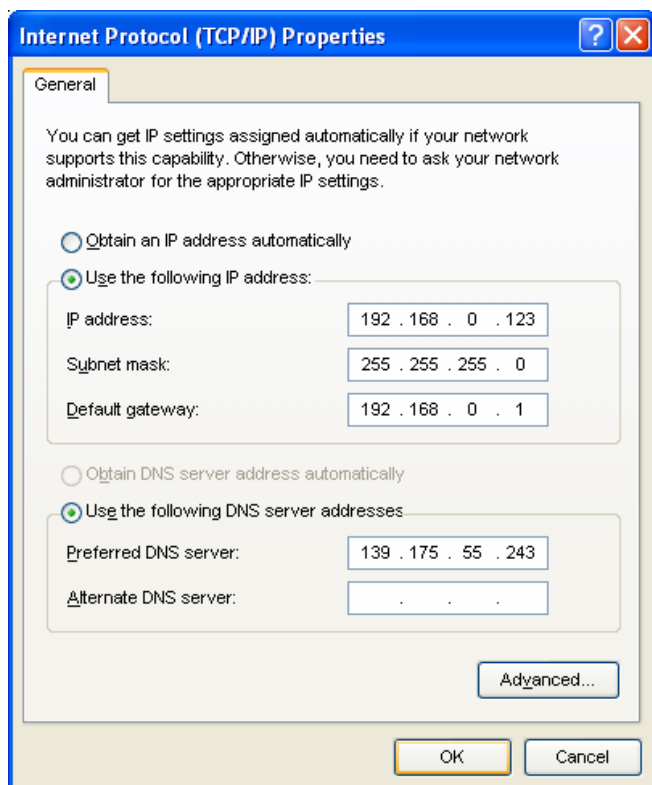

Figure 53

2. Replace the router or server that can assign the IP addresses through DHCP in a LAN.

GV-Hot Swap DVR V2 won't turn on.

If your GV-Hot Swap DVR V2 won't turn on or you don't hear a startup sound or any fan or drive noise, try these steps:

1. Make sure that you switch on the AC power on the rear panel.

Figure 54

2. Make sure that the power cord is properly connected to both the GV-Hot Swap DVR V2 and power outlet. If you are using a power strip, make sure that the strip is powered on.
3. If the problem persists, consult your dealer.

GV-Hot Swap DVR V2 stops responding (aka “crashed” or froze”).

If your GV-Hot Swap DVR V2 is not responding to your clicking, typing, or mouse movements, try these steps to get your GV-Hot Swap DVR V2 back on track. Please note that you will lose any unsaved changes in all open applications.

1. Restart your GV-Hot Swap DVR V2 by pressing the **Reset** button on the front panel.
2. If your GV-Hot Swap DVR V2 is still unresponsive, switch off the **Power** button to shut it down. Wait 30 seconds and then restart your GV-Hot Swap DVR V2.

Figure 55

GV-Hot Swap DVR V2’s hard disk corrupts.

If you are experiencing file system corruption problems, such as lost clusters, cross-linked files or invalid files or directories, try these steps:

1. Use Windows built-in utility to scan your hard disk for errors and attempt to fix them.

Follow these steps:

- A. On the GV-Desktop, click the **Programs** button, and select **Disk Management**. See Figure 49.
- B. Right-click the desired hard disk and select **Properties** from the file menu to display the Properties window.

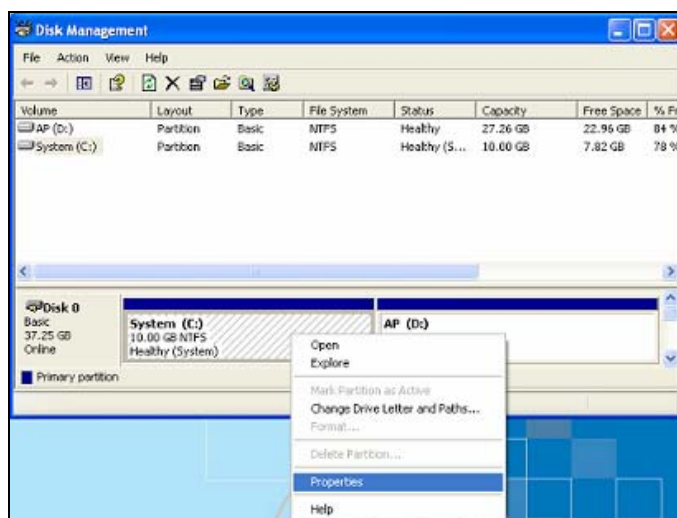

Figure 56

- C. Click the **Tools** tab in the upper portion of the window.

- D. Under Error-checking, click the **Check Now** button.

Figure 57

- E. Select **Automatically fix file system errors** and **Scan for and attempt recovery of bad sectors**.

Figure 58

- F. Click **Start**.
2. If the Windows hard disk utility still cannot fix the problem in Partition C, try rebuilding the operation system and GV-System Software by using the Recovery DVD. Refer to 3.9 *Recovery DVD*.
 3. If the problem persists, replace a hard disk drive.

GV-Hot Swap DVR V2 suffers virus attack.

GV-Hot Swap DVR V2 is designed and optimized for Windows XP platform. It may be vulnerable to newly created worms and exploits that attack any of the underlying operating system's previously undocumented flaws. If your GV-Hot Swap DVR V2 suffers virus attack, try rebuilding the operation system and GV-System Software by using the Recovery DVD. Refer to 3.9 *Recovery DVD*.

GV-Hot Swap DVR V2 has video and/or audio lost.

If your GV-Hot Swap DVR V2 fails to show video, audio or both, try these steps:

1. Check the video/audio connection. Make sure one end of the D-type video/audio cable is securely connected to the video/audio device, and the other end to the video/audio port of the GV-Hot Swap DVR V2.
2. Make sure the video/audio device is turned on.
3. Switch the cable from the functional channel to the non-functional channel, and vice versa. If the previously non-functional channel is now able to deliver video/audio, you should check the video/audio device itself and its related cables.

The screen image appears distorted or jitters.

If the screen image seems to be distorted, jitter, or not to look right, try these steps:

1. Make sure the video standard in your country matches the setting in the GV-Hot Swap DVR V2. Refer to *Configuring the GV-Hot Swap DVR V2 for PAL after Recovery* in *3.9 Recovery DVD*.
2. Make sure the camera and its cable are not damaged or frayed. Try to replace a camera or camera cable to see if this fixes the problem.

How can I find more help?

1. Visit our website at http://www.geovision.com.tw/english/4_1.asp
2. Write us at dvrssystem@geovision.com.tw

Warranty Policy

Warranty Coverage

GeoVision, Inc. warrants **GV-Hot Swap DVR System V2, IR Remote Control, and GV-Keyboard** against defects in materials and workmanship for a period of TWO (2) years from the date of purchase.

Other packaged accessories and software (including but not limited to System Software) are excluded.

If a defect where due to causes attributable to GeoVision arises and a valid claim is received by GeoVision within the Limited Warranty Period, at its option, GeoVision will (1) repair the product at no charge, using new or refurbished replacement parts, or (2) exchange the product with a product that is new or which has been manufactured from new or serviceable used parts and is at least functionally equivalent to the original product.

GeoVision warrants replacement parts or repairs for thirty (30) days from the date of GeoVision shipment or for the remainder of the Limited Warranty Period, whichever provides longer coverage for you. When a product or part is exchanged, any replacement item becomes your property and the replaced item becomes GeoVision's property.

Exclusions and Limitations

The Customer shall have no coverage or benefits under this Limited Warranty if any of the following conditions are applicable:

1. The product has been subjected to abnormal use, failure to follow the instructions prescribed in User's Manuals, improper storage, improper packaging, improper maintenance, unauthorized modifications, unauthorized repair, misuse, neglect, abuse, accident, alternation, improper hardware/software installations, or other acts due to causes not attributable to GeoVision, including damage caused by shipping.
2. The product was not purchased from an authorized distributor or agent.
3. The product has been damaged from exposure to rain, flood, storm, moisture, dampness, weather conditions, an Act of God, force majeure, improper use of any electrical source, or the connection to other products not recommended for interconnection by GeoVision.
4. Defects or damage caused due to virus attack.
5. The product bar code on the system case has been removed, defaced or altered.
6. The system case has been opened.

THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, WHETHER ORAL OR WRITTEN, EXPRESS OR IMPLIED. THE WARRANTY IS LIMITED TO REPAIR OR EXCHANGE THE PRODUCT AT GEOVISION'S OPTION. OTHER EXPRESSED OR IMPLIED WARRANTIES FOR THIS PRODUCT, INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE EXCLUDED IN DURATION TO THE WARRANTY PERIOD. NO WARRANTIES EXPRESSED OR IMPLIED WILL APPLY AFTER THIS PERIOD. GEOVISION SHALL NOT BE LIABLE FOR SPECIAL, DIRECT, INDIRECT, CONSEQUENTIAL DAMAGES. GEOVISION SHALL NOT BE LIABLE FOR LOST PROFITS, LOST OF DATA, PROGRAMS OR OTHER INFORMATION, DAMAGE TO OTHER PROPERTY CAUSED BY ANY DEFECTS OF THIS PRODUCT, OR DAMAGES BASED UPON INCONVENIENCE, LOSS OF PRODUCT USE, LOSS OF TIME, COMMERCIAL USE, INCIDENTAL AND/OR CONSEQUENTIAL DAMAGES FOR THE BREACH OF ANY EXPRESSED OR IMPLIED WARRANTY, INCLUDING DAMAGES TO PROPERTY, AND TO THE EXTENT PERMITTED BY LAW, DAMAGES FOR PERSONAL INJURY, OR OTHERWISE, EVEN IF GEOVISION HAS BEEN ADVISED OF THE POSSIBILITIES OF SUCH DAMAGES.

Warranty Requirements

To validate your purchase, you shall complete the online Product Registration **within 30 days from the date of purchase** at http://www.geovision.com.tw/english/4_6.asp. Or click **GeoVision Online Registration** in My Favorite for a direct link.

If you fail to complete the Product Registration, the warranty period will start **from the date of shipment**.

Before you return the product

Some problems you experience may be related to software or the operating system. It is important to investigate other sources of assistance first. Before returning the product, try the following:

1. Review troubleshooting sections in the documentation for software and peripheral devices.
2. Try rebuilding the operation system and GV-System by using the Recovery DVD.
3. Consult your dealer. They are your best sources for current information and support. Or you can call or email GeoVision offshore offices for assistance.

When you call or e-mail, please inform us the following:

- Model name
- Bar Code
- Recovery DVD version
- Details of the defect or problem
- Attempted solutions
- Your contact information
- Reseller's contact information

4. If you find it is the software problem, please check our website or your dealer for software updates.

Obtaining Warranty Service

If you are still unable to solve the problem and suspect that it is hardware related, follow these:

1. Send an e-mail to GeoVision to start Return Merchandise Authorization (RMA) process.

E-Mail: sales@geovision.com.tw or dvrssystem@geovision.com.tw

2. Securely pack the product in its original carton using the original packing material, or in equivalent packaging.
3. The product shall be returned to **GeoVision, Taiwan** at your expense for shipping and insurance costs.

BEFORE YOU DELIVER YOUR GV-HOT SWAP DVR SYSTEM V2 FOR WARRANTY SERVICE, IT IS YOUR RESPONSIBILITY TO BACK UP YOUR DATA. YOU WILL BE RESPONSIBLE FOR REINSTALLING ALL DATA, SETTINGS AND PASSWORDS. DATA RECOVERY IS NOT INCLUDED IN THE WARRANTY SERVICE AND GEOVISION IS NOT RESPONSIBLE FOR DATA THAT MAY BE LOST OR DAMAGED DURING TRANSIT OR A REPAIR.

Warranty Form

Thank you for purchasing the GV-Hot Swap DVR System V2. To help us validate your purchase and better serve you in the future, please go to http://www.geovision.com.tw/english/4_6.asp or click **GeoVision Online Registration** in My Favorite for a direct link to register online **within 30 days from the date of purchase**. Please keep this copy for your records.
